

Handelsbanken

Adventurous Fund Factsheet

Share Class C

Investment objective

To deliver a total return (the combination of income and capital growth) in excess of the MSCI All Country World Index over any period of 5 years, after all costs and charges have been taken. There is no guarantee that the objective will be met or that a positive return will be delivered over any time period and capital is at risk.

Investment policy

To invest on a global basis at least 80% in equities (which are shares in companies) and equity related securities (investments whose value is linked to the performance of shares in a company) across a variety of different geographic areas and industry sectors. The fund may gain exposure to these assets directly by investing in securities issued by companies, and indirectly, for example by investing in other funds. For the purposes of liquidity management, the fund may also invest in money market instruments (which are short term loans that pay interest), deposits and cash. The fund may also invest in derivatives (investments whose value is linked to another investment, or to the performance of the stock exchange or some other variable factor, such as interest rates) for investment purposes and to manage the risk profile of the fund.

Fund details

Co- managers	Nikki Howes & Benjamin Matthews
Fund launch date	08 July 2019
Share class launch date	08 July 2019
Fund size	£144.8m

Glossary of terms[^]

Active investments: where the fund manager uses their expertise to pick investments to achieve the fund's objectives rather than copying the investments in a market index; **Passive investments:** where the fund manager invests according to the stock or sector weightings of an index. Passive management is also referred to as 'indexing' or 'tracking'; **Direct investments:** financial instruments issued by companies and governments themselves; **Liquidity:** the degree to which an investment can be quickly bought or sold on a market without affecting its price; **Historic yield:** reflects distributions declared over the past twelve months as a percentage of the fund's unit price, as at the date shown. Investors may be subject to tax on their distributions; **Investment Grade:** bonds issued by a company with a medium or high credit rating from a recognised credit rating agency. They are considered to be at lower risk from default than sub-investment grade bonds issued by companies with lower credit ratings; **Emerging markets:** Countries that are progressing toward becoming advanced, usually shown by some development in financial markets, the existence of some form of stock exchange and a regulatory body; **CPI:** the Consumer Price Index, which is used to measure the rate of UK inflation. **Annualised volatility:** a common statistical measure used to assess the risk levels of different investments. It is an annualised figure measuring the dispersion of monthly returns around the average monthly return of that security. If a portfolio has a high volatility, this suggests a greater variation of returns; **Drawdown:** a measure of the downside risk of a portfolio. It is the percentage drop from any peak in a portfolio value to any bottom. It can be applied directly to the size of the portfolio giving an 'estimate' of how much money you could lose at some intermediate point during the life of the investment strategy. Maximum drawdown is the maximum loss from a peak to a trough of a portfolio; **Sharpe ratio:** a risk-adjusted measure of return that is used to evaluate the performance of a portfolio. The ratio helps to make the performance of one portfolio comparable to that of another by making an adjustment for the level of risk associated with the underlying assets held within the portfolio.

Important information

Past performance is not a reliable indicator of future results. The value of any investment and the income from it is not guaranteed and can fall as well as rise, so that you may not realise the amount originally invested. Where an investment is denominated in a currency other than sterling, changes in exchange rates between currencies may cause investment values or income to rise or fall. The portfolios may invest in funds which have limited liquidity, or which individually have a relatively high risk profile and/or are unregulated by the Financial Conduct Authority (FCA).

This material is directed only at persons in the UK and is not an offer or invitation to buy or sell securities. Nothing in it constitutes advice to undertake a transaction, and professional advice should be taken before investing. Performance is as at the publication date of the document and shown after all costs and charges have been taken. The data source is FactSet and Handelsbanken. This document has been issued by Handelsbanken Asset Management. For Handelsbanken Multi Asset Funds, the Authorised Corporate Director is Handelsbanken ACD Limited, which is authorised and regulated by the Financial Conduct Authority (FCA). The Registrar and Depositary is The Bank of New York Mellon (International) Limited, which is authorised by the Prudential Regulation Authority and regulated by the FCA. The Investment Manager is Handelsbanken Wealth & Asset Management Limited, which is authorised and regulated by the FCA. Before investing you should read the Key Investor Information Document (KIID) as it contains important information regarding the fund including charges and specific risk warnings. The Prospectus, Key Investor Information Document, current prices and latest report and accounts are available from Handelsbanken Wealth & Asset Management Limited, or Handelsbanken ACD Limited: 77 Mount Ephraim, Tunbridge Wells, Kent, TN4 8BS or by telephone on +44 01892 701803.

The model's target return benchmark is the MSCI All Country World Index (£, net total return), referred to as MSCIAC World. The MSCI All Country World Index has been selected as the model's target return benchmark as it is a global equity market index that has a broad exposure to different countries, geographic areas and industry sectors, which is in line with the model's investment policy. The model is not constrained by the target benchmark and will take positions in individual stocks, industry sectors, countries and geographic areas that differ significantly from the MSCI All Country World Index, with the aim of achieving a return (the money made or lost on an investment) in excess of the target benchmark.

Handelsbanken Wealth & Asset Management Limited is authorised and regulated by the Financial Conduct Authority (FCA) in the conduct of investment business, and is a wholly owned subsidiary of Handelsbanken plc. Registered Head Office: No.1 Kingsway, London, WC2B 6AN. Registered in England No: 4132340. www.wealthandasset.handelsbanken.co.uk
