Competent Authority: **Financial Conduct Authority**

This document was produced: **06 April 2021**

What is this product?

Type: The Handelsbanken Alternatives Fund ("the Company") is a closed-ended investment company with limited liability incorporated in Guernsey and is regulated by the Guernsey Financial Services Commission ("GFSC").

The Company's Board of Directors ("the Board") has delegated responsibility for the management of the Company's portfolio to the Investment Manager (otherwise referred to as "the Manufacturer" within this KID), Handelsbanken Wealth & Asset Management Limited. The Board has delegated responsibility for the administration of the Company to the Administrator, Praxis Fund Services Limited.

Objectives: To provide long-term growth through a diversified, global, multi-strategy portfolio which, amongst other things, provides access to specialist and/or alternative funds and vehicles which are considered to have an attractive medium to long term return potential. These specialist and/or alternative investments may target specific sectors, themes or geographies and the Company may invest directly or indirectly in private equity, hedge funds, property, alternative credit and infrastructure linked investments.

The Company may also selectively use derivative instruments, including options, for return generation and/or hedging purposes. The Company may also hold cash, money market funds, other cash-like instruments and/or appropriate fixed income securities as part of its portfolio. The Company may also from time to time invest a substantial portion of its assets in exchange-traded funds and other index funds.

Market risks are inherent in all investments that the Company may hold to varying degrees. Should the Company hold a large position in a particular investment that declines in value or is otherwise adversely affected, the return of the Company may be impacted.

Intended retail investor: The product is classified as a non-mainstream pooled investment ("NMPI") by the Financial Conduct Authority. Handelsbanken Wealth & Asset Management Limited has deemed that the product is only suitable for certified High Net Worth investors with net assets to the value of £1,000,000 or more and with sophisticated investor status. An investment in shares should be seen as long term in nature and complementary to investments in a range of other financial assets.

What are the risks and what could I get in return?

Risk Indicator

1 2 3 4 5 6 7

← Higher Risk

Lower Risk

The risk indicator assumes you keep the product for 5 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at medium-low. Poor market conditions are likely to impact the capacity of the Company to pay you.

This product does not include any protection from future market performance so you could lose some or all of your investment.

This product has a long disinvestment notice period. For more information please see the section titled 'How long should I hold it and should I take my money out early?'.

Currency Risk: Movements between the currency of underlying assets and the currency in which the product prices may impact the final return you will get. This risk is not considered in the indicator shown adjacent.

Market Risk: Underlying investments will be subject to normal market fluctuations and the risks inherent in investment in equity securities and similar instruments. There can be no assurance appreciation will occur. Furthermore, any available market value for the underlying investments may vary considerably from their Net Asset Value.

Liquidity Risk: The portfolio may include unquoted investments which are not publicly traded and may therefore be difficult to realise. There can be no assurance that the liquidity of an investment will always be sufficient to meet the redemption requests of that underlying investment.

Leverage or Borrowing Risk: While leverage presents opportunities for increasing total returns, it can also have the effect of increasing losses. The effect of the use of leverage is to increase investment exposure, the result of which is that, in a market that moves adversely the possible resulting loss to investors' capital could be greater than if leverage were not used.

Performance Scenarios				
Investment £10,000				
		1 year	3 years	5 years (Recommended holding period)
Stress scenario	What you might get back after costs	£9,075	£9,066	£8,810
	Average return each year	-9.25%	-3.21%	-2.50%
Unfavourable scenario	What you might get back after costs	£10,041	£10,552	£11,171
	Average return each year	0.41%	1.81%	2.24%
Moderate scenario	What you might get back after costs	£10,381	£11,171	£12,020
	Average return each year	3.81%	3.76%	3.75%
Favourable scenario	What you might get back after costs	£10,706	£11,797	£12,902
	Average return each year	7.06%	5.66%	5.23%

This table shows the money you could get back over the next 5 years, under different scenarios stipulated by the regulations and based on the product's historic share price performance, assuming that you invest £10,000.

The scenarios shown illustrate how your investment could perform. You can compare them with scenarios of other products.

The scenarios presented are an estimate of future performance based on evidence from the past, and are not an exact indicator. What you may get will vary depending on how the market performs and how long you keep the investment.

Furthermore, this information is compiled according to prescribed formulae which take into account, amongst other things, past performance of assets held in the fund over a 5 year period. As performance data for the fund is not available for the full period of time, regulation requires the performance data for the remaining period to be substituted with a proxy index.

The figures shown include all the costs of the product itself and do not include any costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect the amount you get back.

What happens if Handelsbanken Wealth & Asset Management Limited is unable to pay out?

If Handelsbanken Wealth & Asset Management Limited ("the Manufacturer") were to default, investors in the Handelsbanken Alternatives Fund ("the Company") would not face a financial loss as a result.

The Handelsbanken Alternatives Fund is not regulated by the FCA and investors may not have the benefit of the Financial Services Compensation Scheme and other protections afforded by the Financial Services and Markets Authority (FSMA) in the event that the Handelsbanken Alternatives Fund is unable to pay any dividends due to you or if it were unable to pay any amounts due to you on the winding up of the Company.

What are the costs?

Costs over time	The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, on-going and incidental costs.			
	The amounts shown here are the cumulative costs of the product itself for three different holding periods. They include potential early exit penalties. The figures assume you invest £10,000. The figures are estimates and may change in the future.			
	The person selling to you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.			
	Investment £10,000	If you cash in after 1 year	If you cash in after 3 years	If you cash in at the end of recommended holding period
Total Costs	£420	£1,286	£2,147	
Impact on return (RIY) per year	4.20%	4.20%	4.20%	

Composition of Costs	The table below shows:			
	<ul style="list-style-type: none"> The impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period. The meaning of the different cost categories. 			
	One Off Costs	Entry costs	0.00%	The impact of the costs you pay when entering your investment.
		Exit costs	0.00%	The impact of the costs of exiting your investment when it matures.
	Ongoing Costs	Portfolio transaction costs	0.08%	The impact of the costs of us buying and selling underlying investments for the product.
		Other ongoing costs	2.95%	The impact of the costs that we take each year for managing your investments.
	Incidental Costs	Performance fees	1.17%	The impact of a performance fee, where applicable.
Carried Interests		0.00%	The impact of carried interests, where applicable.	

How long should I hold it and can I take money out early?

The majority of the Company's investments are considered to have an attractive medium to long-term return potential. It is therefore recommended that the product is held for the long-term, which is widely accepted as five years or more.

It will take between 9 to 12 months to fully redeem and settle shares following an investor's redemption request. Redemption days are fixed quarterly dates, being the first business day of January, April, July and October. Investors should submit redemption requests to the Manufacturer; the Manufacturer is then required to give at least 90 calendar days' prior written notice to the Administrator in respect of a redemption day.

The Board retains the absolute discretion to cease offering the above discretionary redemption facility at any time or to modify it in such manner as they determine in good faith to be appropriate.

In normal market circumstances, and subject to available liquidity in the Company's portfolio, 50% of the redemption proceeds will be paid no earlier than 90 calendar days after the relevant redemption day. The remaining 50% of the redemption proceeds will be paid no earlier than 180 calendar days after the relevant redemption day.

How can I complain?

If you have any complaints about the product, the conduct of the Manufacturer or the person advising on or selling the product, please contact our Head of Compliance via the following contact details:

- Address: Handelsbanken Wealth & Asset Management Limited, No. 1 Kingsway, London, WC2B 6AN.
